Technologies

Languages: C++,NoSQL, SQL, JavaScript

Frameworks / Tools: Express.js, React.js, Github,Vscode

Courseworks: Data Structures and Algorithm, OOPS Concept, Operating Systems.

Projects

Blog Application

Project [🔗](#)

- Implemented CRUD operations for blog posts with user authentication, and responsive front-end design. Used MongoDB for data storage.
- Tools Used: MERN Stack.

Ecommerce-Website

Project [🔗](#)

- Implemented product listings, search functionality, shopping cart, and checkout features to enhance user experience and improve performance.
- Tools Used: React.js

Authentication Login form

Project [🔗](#)

- . Implemented user authentication and authorization using JWT to secure user data. Focused on optimizing server performance and database queries for a seamless user experience.
- Tools Used: MonogdB, Express.js, JWT, Cookies

Experience

DRDO, Backend Intern

Delhi,India

July 2022– Sep 2022

- Collaborated with the development team to design and implement backend solutions for projects related to defense technology.
- Developed and maintained backend systems, ensuring scalability, reliability, and security

Education

Maharshi Dayanand University , Rohtak

Sept 2021 – May 2024

- Btech - Computer Science and Engineering : 77

Kasturba Institute of Technology , Delhi

July 2017 – Sep 2020

- Diploma - Digital Electronics : 78

Certifications/Achievements

Data Structures and Algorithms - **Codehelp**

MERN Stack Development - **Codehelp**

I have solved over 350+ problems on [Leetcode](#) [🔗](#)

I have solved 300+ problems on [Geeks for Geeks](#) [🔗](#) and hold a rank of 45 at MDU, Rohtak.
